

NORTH BAY WATER REUSE PROGRAM *Water Supply Reliability through Regional Reuse*

San Jose's Guadalupe Community Garden - The First to Use Reclaimed Water

The newest addition to San Jose's city-wide Community Gardens program utilizes reclaimed water.

The Guadalupe Community Garden is one of 19 community gardens - occupying approximately 37 acres of land - operated by the City of San Jose that benefits of its residents and the environment. Guadalupe Community Garden consists of 33 plots that are not only a beautiful addition to the neighborhood, it was the first community garden to use reclaimed water.

It is a beautiful facility, with raised beds, a tool shed and a nice covered area for garden workshops and gatherings. The garden is perfect for residents that want to grow their own produce, flowers and herbs, but also plays a role in the Green Vision for the city. One element of the Green Vision is to recycle or beneficially reuse 100 percent of the wastewater.
